

Invitation – ZEISS Workshop

Live Cell Imaging in Different Technologies

March 13, 2019 – 9am

University of Gothenburg, Centre for Cellular Imaging

You are cordially invited to the workshop “Live Cell Imaging in Different Technologies” with focus on ZEISS Cell-discoverer 7 and recently launched ZEISS ELYRA 7.

Join us for an insight into the applications of instruments and software for live cell imaging and take advantage of this unique opportunity and learn how your work can benefit from a flexible platform for fast and gentle super-resolution imaging.

Program highlights of the day:

- Live cell imaging - From high content to high resolution
- Analyzing your live cell data - Benefit from Intellesis software and image analysis
- Visualization of your live cell data - Deconvolution of data and Arivis technologies
- Q&A and case studies
